Please contact the label vendor for specifics regarding how to create pallet labels.

PLACEMENT - Each pallet will have one unique license plate number (LPN) with 2 License Plates Labels. When facing the front of the pallet (40" side), the LPN will be affixed on top of the stretch wrap on the front side and adjacent 48" right side of the pallet. The label should be placed 6 to 10 inches from the top and 6 inches from either vertical edge.

GS1 DOT (formerly the Uniform Code Council) GS1 is the global standards authority for item (UPC and EAN) and logistical numbering. In addition to managing numbering assignments, GS1 provides industry guidelines for supply chain identification. Every country has a regional organization and GS1 DOT is the non-profit organization in the United States. Dot's pallet label requirements are based on GS1 standards. For detailed information regarding GS1 Identification, visit <http://www.gs1us.org/>.
